

Rolled Paper Art

Cut 3/4" strips of paper and/or magazines. Fold each paper strip in half long ways. Cover one side of the folded paper strip with the gluestick. Roll tight paper rolls with your hands. Glue multiple paper strips end-to-end to make larger rolls. Glue or tape end of paper roll so it doesn't unravel.

Make various sizes of paper rolls and different colors. Let the rolls dry completely before gluing to a cardboard or chipboard base. The base can be painted with acrylic paint before gluing the paper rolls to it.

Use Elmer's glue to glue the rolls to the base leaving a small border all the way around as seen in the example picture or create your own design.
